

REBUTTAL TO ARGUMENT IN FAVOR OF MEASURE T

The argument in favor of measure T raises an interesting question:

Is this the opinion of the president of the police association because he wants more police as members of his union, or because the citizens need more police to fight crime?

Violent crime is down in La Habra.

City council decided we have enough money to add three code enforcement officers. How is it that we have enough money to hire these code enforcement officers and not police officers? Is it more important to investigate permit violators than to chase criminals? We have enough money for everything we need but they still want more, and they are trying to use improper scare tactics to get your vote.

When deciding how to vote on this measure, ask yourself: Does the government need the money more than most of the families who live in our city? In today's economy there can be only one answer.

Please vote no on measure T
