

## ARGUMENT IN FAVOR OF MEASURE K

### Vote yes on Measure K

Los Alamitos Unified School District has earned a state and national reputation for educational excellence. However, our schools are 42 – 57 years old and in need of repairs. In order to provide our local students with classrooms and school facilities comparable to other high achieving Orange County school districts, our schools now need renovations and upgrades.

### Measure K will repair and upgrade local school buildings including:

- Replace, upgrade and install electrical wiring/power and other infrastructure improvements to accommodate technology and computers in classrooms and libraries
- Replace outdated heating, ventilation, and air conditioning equipment with modern energy-efficient systems
- Upgrade Science labs to insure all school labs meet current curriculum requirements
- Renovate aging classrooms to meet current standards

**Measure K will allow our District** to qualify **to receive \$ 19 million** in state grants. Otherwise, these funds will go to other school districts that have passed a local school bond.

Measure K will benefit every city/community and fund necessary repairs, upgrades and school construction projects at all local schools. All money raised by Measure K will stay in our community benefiting our local children and economy.

### Taxpayer protection guaranteed by law

Funds from Measure K can only be used for the specific facility projects detailed in the sample Ballot. Measure K requires an independent citizen oversight committee and mandatory independent annual audits. No funds can be used for administrator salaries.

For our students, our communities, our property values, vote YES on Measure K.
