

MIKE GONZALEZ
Public Safety Consultant

AGE: 51

As we all continue to address the ongoing impacts of COVID-19 and the need for higher education in our community, the role of our Rancho Santiago Community College District is very important.

Here are some priorities:

Increasing number of students successfully transferring from community college to four year universities.

Training recent high school graduates for current and future employment opportunities.

Creating new programs for mid-career workers looking for new job skills.

Ensuring the physical and health safety of our college students, faculty and staff at our campuses.

Partnering with our school districts and City of Santa Ana to improve educational opportunities at Santa Ana College, our continuing education programs at Centennial Park, and other sites throughout our City.

I would be honored to receive your vote.
