

ROBERT R. "BOB" MCVICKER

Water Resources Engineer

Your vote will allow me to put a lifetime of experience in the water industry to further good use. I have been a resident of Fountain Valley for 34 years and have 37 years of experience in the water industry through employment with water agencies, engineering consulting firms and private regulated water utilities in Orange County and Los Angeles County. I am committed to ongoing investments in water to ensure the long-term reliability of our water supplies while maintaining low water rates and healthy water quality. I was appointed as Director of the Municipal Water District of Orange County (MWDOC) Division 3 in June 2019 and would like to continue serving the residents of Fountain Valley, Westminster and portions of the City of Garden Grove and Golden State Water Company. I would also continue providing policy direction to MWDOC's four board members appointed to the board of the Metropolitan Water District of Southern California, the main importer of water into Southern California from Northern California and the Colorado River. It is a big job and I will use my background and expertise to serve you well. I am semi-retired and have the time to devote to this position.
