

**COSTA MESA SANITARY DISTRICT
DIRECTOR**

BRIAN PEOTTER

Aerospace Engineer

My primary reason to seek this position is to shut down the Costa Mesa Sanitary District. As Program Manager of Research and Development I solve problems every day. I want to use these skills to solve the problem of a redundant agency and work myself out of a job.

The Costa Mesa Sanitary District was created before Costa Mesa was incorporated. This is why we have this special district when most other cities do not. I believe after seventy years it is time to put this dinosaur of a bureaucracy out to pasture, and stop wasting money.

The Sanitary Board already contracts out most of the services we use. Transferring the management of these services to Mesa Water, or the City of Costa Mesa will allow for consolidation of employees, and reduction of overhead. To drive home the point that this board is unnecessary, did you know the current trash contract hasn't been put out to bid since WWII? Consolidating this service is common sense and long overdue.

Vote for Brian Peotter so I can fire myself!
