

ED RUSHMAN

PARTY: NONE

IT Project Manager

We in the 46th District respect life and want the Dream Act. No party stands for both so we need independent representation. I've taken no money from anyone nor will I take direction from any party, lobby, or special interest group. I will represent you, making sure your best interests and values have a voice at the national level. By electing the first independent Representative since 2007, we will make the nation hear us.

Carol and I raised six children here while I built a career in technology, solving problems and leading teams to success through respect for people and a focus on achieving results. There have been hard times; together we face the struggle against rising costs with level income and we worry about our children's future.

As your Representative, I'll provide weekly reports online with plain language on pending budgets, legislation and meetings with other legislators or anyone seeking my vote on a proposed bill, just as I communicate weekly status reports to my employers today. I'll live modestly, cut spending on unnecessary trips and mailings, and with my extensive experience leading teams, the congressional staff will be effective in serving you.

I am for all of us and together we will show Congress that we are not divided, that we can be one Nation, free of money politics and partisan conflict. I believe the 46th District, young and old, student and worker, single and family, will lead the way.
