

LONG PHAM

Engineer/Business Owner

REPUBLICAN

I will fight to cut California's tax rates and suspend job killing regulations and mandates.

California has the nation's highest taxes and one of the highest unemployment rates. As an engineer, and small business-owner, I know how to fix this problem; get government out of the way and set the market free.

Facing the business downturn, Governor Pete Wilson asked me to help identify and repeal nearly four thousand anti-business, anti-job regulations in 1997. That move spurred tremendous economic growth, and we can do that again. My first-hand experience and proven record of results will make a difference in Sacramento.

As an engineering leader, I lobbied Congress for the passage of a tax provision in 2000 to make the cost of continued and higher education a tax credit for every American.

As an engineer, I've lived my life solving problems with solutions that work. As a County Education Trustee, I have maintained a solid conservative voting record on fiscal and social issues.

As an energy engineering expert, I will promote more oil and energy exploration to bring down gas prices, and I will introduce an immediate measure to suspend the gas tax. California should not have the nation's highest gas prices.

As your assemblyman, I will advocate for strengthening math and science in K-12 education, and will donate one hundred percent of my assembly's salary for student scholarship and for social needs in the District.

I would be honored to have your support. For more information, please visit www.Pham4assembly.com
